FIBERGRATE STAIR TREAD COVERS WITH FIBERPLATE

Complete School Portable Stairs & Landings

Fibergrate Stair Tread Covers are a convenient way to provide solid, slip resistant footing for existing treads that are still structurally sound.

Stair Tread Covers may be installed over wood, concrete or metal steps. Fibergrate's Aquagrit surface provides a high level of slip resistance, yet at the same time offers a comfortable barefoot walking surface. Protection against long-term UV exposure is provided by a synthetic surfacing veil and UV inhibitors in the resin formulation.

Based on the inherent hardness of the grit surface and its durable corrosion resistant construction, you can count on Stair Tread Covers from Fibergrate to stand up to daily use for years to come.

FRP Stair Tread Cover Advantages

- Slip Resistant
- Long Maintenance-Free Life
- Highly Durable
- Low Installation Cost
